A little bit of history...

After the assassination of her husband Henri IV, Queen Marie de Médicis wanted to move out of the Palais du Louvre and dreamt of building a Florentine-style palace and park inspired by the Boboli gardens, which reminded her of her native Tuscany.

In 1612, she acquired the Hôtel de François de Luxembourg, which gave its name to the garden. At that time, the garden covered just eight hectares, but Marie de Médicis made numerous acquisitions to enlarge it. Baron Haussmann's work during the Second Empire gave the garden its current appearance. It now covers 23 hectares.
